TECHNOLOGY, INCLUDING THEIR
WMS, OMS, AND
FREIGHT AUDIT & PAY
(FAP) TOOL.**

A no-brainer for large, complex shipping operations.

ProShip and Infios Supply Chain solutions seamlessly integrate through common touchpoints—such as during waving events (traditional or continuous) and at pack complete—empowering high-volume shippers to effortlessly optimize their logistics and fulfillment operations for maximum efficiency with a partnered solution for long-term outcomes.

How Infios customers win with ProShip.

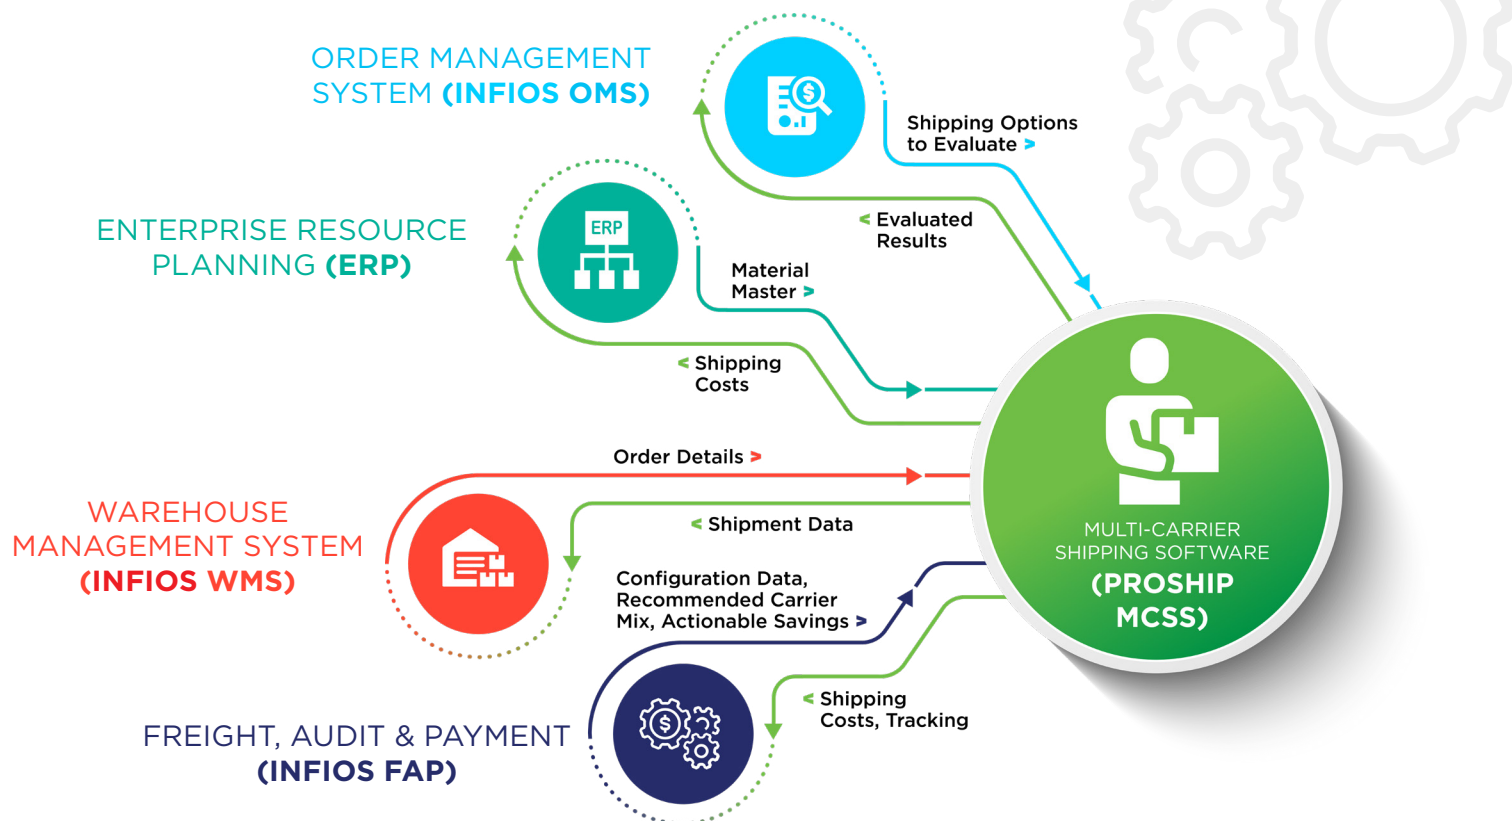

Maximize your Infios OMS and/or WMS investment. ProShip's leading shipment execution speed and feature-rich architecture allows high-volume shippers to utilize all enterprise applications to their fullest potential, including seamless returns processing and enhanced shipment tracking and visibility.

Quickly expand and tailor your carrier options. ProShip's compliant API and platform carrier engines give Infios users access to national, regional, same-day/next-day, and LTL delivery choices right within their current workflows.

Stay effortlessly compliant, even with an increase in carrier changes. With ProShip's versionless architecture and Continuous Integration/Continuous Deployment (CI/CD) process, Infios users can enjoy peace of mind, knowing they're always carrier-compliant and never at risk of missing critical updates.

A closer look at how Infios and ProShip optimize your Enterprise Software Stack.

The last shipping software you'll ever need.
