

Which shipping software is right for my business?

As the leader in parcel logistics shipping technology, ProShip, Inc., offers two well-respected multi-carrier shipping software products: **ProShip** and **WorldLink**.

The incorporation of the WorldLink solution into ProShip's already robust product offerings allows ProShip, traditionally catering to **enterprise-level** shipping needs, to provide additional value to the entire **mid-market**.

Explore the **differences** between the two solutions in this comparison chart.

		 WorldLink	 ProShip
		A multi-carrier shipping solution built for mid-sized North American retailers, manufacturers and Third-Party Logistics Companies (3PLs).	Industry-leading multi-carrier shipping software for global mid- to enterprise level retailers, manufacturers and 3PLs.
Performance & Install	Primary Shipment Workflow	<ul style="list-style-type: none"> Dedicated Shipping Stations (End-of-Line) Browser-based shipping UI 	<ul style="list-style-type: none"> API/Blackbox (Front-of-Line, End-of-Line, Automation Equipment) Secondary Shipping Station Processing (Exceptions, Hazmat, International, etc.)
	Daily Parcel Throughput Sweet Spot*	SMB - Mid-Market (100-5,000 + seasonal volume)	Mid-Market to Enterprise (5,000 - Millions)
	Software Stack Integrations (ERP, WMS, OMS, Ecom, etc.)	SMB & Mid-Market	Mid-Market to Enterprise
	Deployment Options	Premise/Cloud/Hybrid	Premise/Cloud/Hybrid
	Average Implementation Speed†	★★★★★	★★★
	Complex Business Rule Capacity	★★★	★★★★★
Carrier & Parcel Features	Carrier Connectivity Options + Origins Supported	North America	Global
	Carrier Optimization (Rate Shopping & Carrier Rules)	★★★	★★★★
	LTL	★★★	★★★★
	Hazmat Capabilities	Limited Quantity & ORMD	Advanced Global
	Reporting	★★★★★	★★★
Other	Scalability	★★★	★★★★★
	Support	In-House 24/7/365	In-House 24/7/365
	Solution Pricing	\$\$\$\$\$	\$\$\$\$\$\$\$\$\$

* This notes the average daily throughput sweet spot for both products - these numbers aren't absolute and outliers do exist in both directions.

† Quickness due to baseline configurability, technical environment complexity, and effort to install for basic out-of-the-box functionality. Average speed is based off combined vendor and customer collaboration.

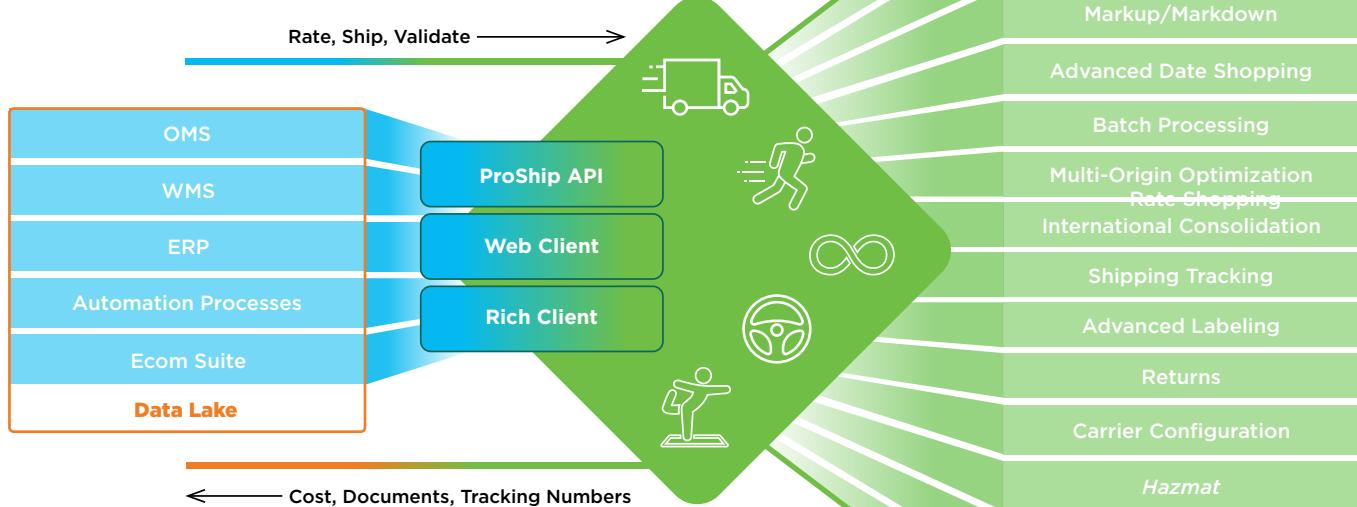

WorldLink, formerly a product of CMS GlobalSoft, is a browser-based multi-carrier shipping software built for mid-size retailers, manufacturers, healthcare, and third-party logistics providers. With a wide range of out-of-the-box features, WorldLink shipping software allows companies to manage multiple distribution centers across North America from a convenient and centralized server, meeting your shipping needs today and as your business grows.

WorldLink Customers

ProShip multi-carrier shipping software is the most trusted parcel rate shopping technology for enterprise retailers, manufacturers and third-party logistics providers. With simple carrier connectivity and high flexibility, ProShip enables complex features & functions, such as maintaining compliance, executing multi-carrier rate shopping with unified business logic, and empowering omnichannel fulfillment. Because ProShip integrates with multiple parts of your Enterprise Software Stack (ESS), the ProShip multi-carrier shipping solution can automate the supply chain workflow & turn your parcel shipping operation into an efficient powerhouse.
