ProShip

SHIPPING APP

Access your shipping operations from any intranet-connected device.

Support for shipping, voiding, and closeout operations across all browsers and platforms

Solid integration component with over 20 years of refinement

Streamlined client workstation requirements, reducing IT overhead and setup complexities

Seamless incorporation of the latest industry technologies and methodologies for enhanced efficiency and collaboration

Automation of business rules to minimize operator's time to ship

Streamlined browser-based access to your entire shipping process.

In today's rapidly evolving business landscape, top enterprise brands understand the critical importance of leveraging advanced shipping technology to stay ahead of the competition. Functionality stands at the core of success, and we believe modern multi-carrier shipping solutions should be flexible enough to be fully functional while streamlining shipping operations. ProShip's Shipping App unlocks a modern user interface to wrap all manual shipping into a single browser-based platform.

What is the Shipping App?

Streamline shipping operations with ProShip's efficient, configurable shipping app.

The innovative Shipping App offers ProShip customers a browser-based solution designed to revolutionize shipping operations with its lighter footprint and configurable integration capabilities. With the seamless combination of a browser-based Shipping UI and a ProShip hardware connector where devices like scanners, scales, and thermal barcode printers can reliably and rapidly be used wherever needed, enterprise brands are fully empowered to scale from desktop shipping to entirely automated, manned warehouse shipping solutions - all utilizing a single code and business rule base from the ProShip Product Suite.

The Shipping App offers unparalleled convenience, allowing the entire enterprise to leverage the same user interface and business rule set while minimizing the workstation burden associated with specific workflows. Whether it's a one-off shipment or a comprehensive shipping operation, ProShip's Shipping App ensures streamlined processes and improved efficiency.

The new Shipping App is all-encompassing.

All People.
Everyone can ship without the risk of rogue shipments, from business offices, to high volume warehouses, to stores.

All Hardware.
Hardware, such as scanners, scales, and thermal barcode printers, can be easily connected wherever needed.

All Stack.
The whole shipping process can be connected with the rest of your Enterprise Software Stack (ESS).

Discover the Powerful Shipping Capabilities of the Shipping App

Modern shippers require robust solutions. Designed to meet the demands of today's evolving market, this cutting-edge solution offers a range of customer-driven features, meticulously selected to empower shipping operations. ProShip understands the challenges you face, and that's why the Shipping App was built to support enterprise shippers, every step of the way.

SHIPPING PROCESS

Rate Shop
Automatically shop the lowest cost with a single click via rate shopping and time in transit shopping.

Print Shipping Labels
Easily generate and print labels for shipments.

Cancel Orders (Void)
Effortlessly cancel or void orders that need to be discontinued or modified.

Close Manifests
Finalize manifests to streamline the shipping process and maintain accurate records.

View Shipping History/Reprint
Access a detailed log of all past shipments for reference and tracking purposes.

SOFTWARE FEATURES

Simplified Rollout and Administration
Experience a streamlined and hassle-free deployment process without the need for local installations on client workstations.

Device Configuration
Seamlessly configure and manage a variety of devices like USB scanners, scales, and printers through the included ProShip hardware connector.

Enhanced Application Security
Advanced application security measures, providing robust protection and minimizing the need for custom-built security solutions.

Single Point of Integration
Centralized configuration and centralized business rules allows you to change once and apply everywhere, enterprise-wide.
